Acetate, in steroid biosynthesis, 599
ACTH, and adrenal protein synthesis, 579
chronic treatment with, effect on maturation of, 669
delayed secretion of, in rats with hypothalamic lesions, 28
effects on gestation, 64
feedback receptor site for, 279
from pituitary transplants, 939
release of, during bacteremia, 894
pathways by which trauma and ether induce, 981
secretion of, stress-induced fetal-maternal, 737
Adrenal cortical necrosis, dimethylbenzanthracene-induced, inhibition of, 284
Adrenal hypertrophy, dependency of, on estrogen, 661
Adrenal secretion, and angiotensin, in rats, 325
Adrenal steroids, specific activity of, 543
Adrenals, fetal, of marmoset monkeys, 382
Adrenocortical function, in the rat, 509
Amino acid(s), accumulation of, and estrogens, 483
incorporation of, into rat adrenal protein, effects of adrenocorticotrophin and growth hormone on, 495
by thyroid, 468
Amphenone, inhibition of adrenal pregnenolone biosynthesis by, 567
Androgen, exogenous, failure of anterior hypothalamic lesions to modify male accessory sex gland responses to, 151
Androgens, and nucleic acids, 635
Angiotensin, and adrenal secretion, in rats, 325
Anion uptake, and parathyroid hormone, in isolated mitochondria, 388
Ascorbic acid content, diurnal variation of, in pseudopregnant ovary, 493

Blood glucose, and vasopressin analogues, 803
Bone collagen synthesis, PTE effect on, 180
Bone formation, intramedullary, estrogen-induced, in Japanese quail, 646
Bone metabolism, and parathyroid extract, 133

Calciferol, effects of, on milk secretion in rats, 554
Calcium, serum, increased mobilization of, 554
Carbohydrate synthesis, in liver, effect of adrenal steroids on, 123
Cell renewal in interstitial tissue, 996
Chlorpromazine inhibition of vasopressin release, 889
Cholesterol, role of, in biosynthesis of adrenal steroids, 543
Chorionic gonadotrophin, human, immunologic differentiation of, 83
Corpora lutea, rat, uterus and life span of, 501
structure and function of, effect of unilateral ovariectomy on, 462
Corpus luteum, in hypophysectomized rabbit, maintenance of, by gonadotrophins, 453
regression of, relationship of developmental stage to, 355
Corticosteroid action on fetal thymus and spleen, 986
Corticosterone, fluorometric determination of, 653
Cortisol, effects on uterine response to estrogen, 955
fluorometric determination of, 653
repair of acidophil function by, 784
Cortisone, antigranulomatous action of, inhibitory effect of glycyrrhizin on, 145
and protein synthesis, 709
Cryptorchidism, and dehydrogenase activity, 44

Depancreatized chickens, growth and reproduction of, 207
DHEA, and testicular androgens, 35
Diabetes insipidus, familial hypothalamic, neurohypophysial principles in, 153
Dihydrotachysterol (Hytakerol), effects of, on milk secretion in rats, 554
Dimorphism, bilateral adrenal, in the coypu, 515
DPN dehydrogenase, of liver and kidney, 521

18-Hydroxysteroid formation in mouse adrenals, 865
18-Hydroxytestosterone, synthetic, some biological properties of, 999
Epinephrine, and glucagon glycogenolysis, 930
intravenous, effect of, on blood ACTH concentration, 807
Erythropoietin, and stroma formation, 960
target cells, 968
Estradiol, influence of, on thyroid: serum radioiodide concentration ratios, 680
Estrogen, action of, cortisol effect on, 955
dependency of adrenal hypertrophy on, 661
transfer of and binding by placenta, 949

Fatty acid synthesis, hepatic, in diabetes, 21
Fructose, metabolism of, by adipose tissue, effect of insulin on, 142
FSH, immunological and biological properties of, 314
new sensitive bio-assay for, 440
releasing factor, 446

Glucagon, and epinephrine glycogenolysis, 930
Gluconeogenesis, in pyridoxine deficiency, 742
Glutamine synthesis, effect of insulin on, 518
Glutamine synthetase activity after portacaval shunt, 805
Glycogen, uterine, effect of histamine and estrogen on, 701
Glycoproteins, and sex steroids, 825
Glycyrrhizin, inhibitory effect of, on antigranulomatous action of cortisone, 145

Acetate, in steroid biosynthesis, 599
ACTH, and adrenal protein synthesis, 579
chronic treatment with, effect on maturation of, 669
delayed secretion of, in rats with hypothalamic lesions, 28
effects on gestation, 64
feedback receptor site for, 279
from pituitary transplants, 939
release of, during bacteremia, 894
pathways by which trauma and ether induce, 981
secretion of, stress-induced fetal-maternal, 737
Adrenal cortical necrosis, dimethylbenzanthracene-induced, inhibition of, 284
Adrenal hypertrophy, dependency of, on estrogen, 661
Adrenal secretion, and angiotensin, in rats, 325
Adrenal steroids, specific activity of, 543
Adrenals, fetal, of marmoset monkeys, 382
Adrenocortical function, in the rat, 509
Amino acid(s), accumulation of, and estrogens, 483
incorporation of, into rat adrenal protein, effects of adrenocorticotrophin and growth hormone on, 495
by thyroid, 468
Amphenone, inhibition of adrenal pregnenolone biosynthesis by, 567
Androgen, exogenous, failure of anterior hypothalamic lesions to modify male accessory sex gland responses to, 151
Androgens, and nucleic acids, 635
Angiotensin, and adrenal secretion, in rats, 325
Anion uptake, and parathyroid hormone, in isolated mitochondria, 388
Ascorbic acid content, diurnal variation of, in pseudopregnant ovary, 493

Blood glucose, and vasopressin analogues, 803
Bone collagen synthesis, PTE effect on, 180
Bone formation, intramedullary, estrogen-induced, in Japanese quail, 646
Bone metabolism, and parathyroid extract, 133

Calciferol, effects of, on milk secretion in rats, 554
Calcium, serum, increased mobilization of, 554
Carbohydrate synthesis, in liver, effect of adrenal steroids on, 123
Cell renewal in interstitial tissue, 996
Chlorpromazine inhibition of vasopressin release, 889
Cholesterol, role of, in biosynthesis of adrenal steroids, 543
Chorionic gonadotrophin, human, immunologic differentiation of, 83
Corpora lutea, rat, uterus and life span of, 501
structure and function of, effect of unilateral ovariectomy on, 462
Corpus luteum, in hypophysectomized rabbit, maintenance of, by gonadotrophins, 453
regression of, relationship of developmental stage to, 355
Corticosteroid action on fetal thymus and spleen, 986
Corticosterone, fluorometric determination of, 653
Cortisol, effects on uterine response to estrogen, 955
fluorometric determination of, 653
repair of acidophil function by, 784
Cortisone, antigranulomatous action of, inhibitory effect of glycyrrhizin on, 145
and protein synthesis, 709
Cryptorchidism, and dehydrogenase activity, 44

Depancreatized chickens, growth and reproduction of, 207
DHEA, and testicular androgens, 35
Diabetes insipidus, familial hypothalamic, neurohypophysial principles in, 153
Dihydrotachysterol (Hytakerol), effects of, on milk secretion in rats, 554
Dimorphism, bilateral adrenal, in the coypu, 515
DPN dehydrogenase, of liver and kidney, 521

18-Hydroxysteroid formation in mouse adrenals, 865
18-Hydroxytestosterone, synthetic, some biological properties of, 999
Epinephrine, and glucagon glycogenolysis, 930
intravenous, effect of, on blood ACTH concentration, 807
Erythropoietin, and stroma formation, 960
target cells, 968
Estradiol, influence of, on thyroid: serum radioiodide concentration ratios, 680
Estrogen, action of, cortisol effect on, 955
dependency of adrenal hypertrophy on, 661
transfer of and binding by placenta, 949

Fatty acid synthesis, hepatic, in diabetes, 21
Fructose, metabolism of, by adipose tissue, effect of insulin on, 142
FSH, immunological and biological properties of, 314
new sensitive bio-assay for, 440
releasing factor, 446

Glucagon, and epinephrine glycogenolysis, 930
Gluconeogenesis, in pyridoxine deficiency, 742
Glutamine synthesis, effect of insulin on, 518
Glutamine synthetase activity after portacaval shunt, 805
Glycogen, uterine, effect of histamine and estrogen on, 701
Glycoproteins, and sex steroids, 825
Glycyrrhizin, inhibitory effect of, on antigranulomatous action of cortisone, 145

Gonadotrophin(s), human pituitary, purification and separation of, 236
intravenously injected, recovery of, in rat urine, 298
pituitary and serum, comparison of, 489
secretion of, stimulated by anti-HCG, 52
Gonadotrophin assay, of pituitaries from sexually mature quail, 498
Gonadotropin stimulation, of progesterone synthesis, specificity of, 664
Growth hormone, pituitary, immunochemical properties of, after pepsin digestion, 532
stimulation of release of, 408

Heparin, and adrenal steroids, 159
HGH, biological and immunological assays of, 366
Hydrocortisone, and parathyroidectomy, effects of, on intestinal absorption of calcium and phosphate, 421
Hyperthyroidism, experimental, in the rat, 509
Hypophysectomized rat, nutritional state and effect of acute water loading in, 1001
Hypophysectomy, transauricular, in rats and mice, 301
Hypophysial-corpus luteum relationship, 9
Hypothalamus, and prostate, 114

^{131}I compounds in thyroid veins before and after TSH administration, 902
^{131}I release, thyroidal, stimulation of, by thyroxine or propylthiouracil, 294
^{131}I-L-T3 uptake of red blood cells, relationship of cell maturation to, 689
Insulin, action in chickens, 946
effect of, on glutamine synthesis, 518
on metabolism of fructose by adipose tissue, 142
in elastic tissue, 914
secretion of, effect of stimulation of cerebellum on, 361
Iodide, and thyroid hormone synthesis, 731
Iodine, release of stable, TSH stimulation of, 395
turnover of, 973
Isografts, hypophysial, in mice, 586

Lactation, in rats, after spinal cord section, 548
LH, release of, inhibition of, 309
Luteinization, serotonin suppression of, 885
Luteinizing hormone, immunologic differentiation of, 83
plasma, fluctuations in, during estrous cycle, 814
titration of antibodies to, 290

Mammary tissues, mouse, in organ culture, 853
Mineralocorticoid antagonist (SC-11835), 724
MSH, permeability effect of, on rabbit's eye, 255
MSH hormones, effect of, on thyroid, 559
MtT rats, pituitary-adrenocortical system in, 617

Ovariectomy, effect of, on pituitary and serum gonadotrophins, 102
Oviposition, premature, following operative interference with brain, 193
Ovulation, copper-induced, in the rabbit, 780
and corpora lutea formation, 14
progesterone-induced, minimal age for, 793
Oxytocin, excretion and distribution of, 226

Pancreatectomy, effect of, on adrenal medullary response to hypoglycemia, 656
Parathyroid, inhibition of bone collagen synthesis by, 180
Parathyroid extract, and bone metabolism, 133
effects of, on milk secretion in rats, 554
and kidney phosphate, 90
Parathyroid hormone, and anion uptake, in isolated mitochondria, 388
effects of, on bone, 165
immunoassay of, 244
Parathyroidectomy, and hydrocortisone, effects of, on intestinal absorption of calcium and phosphate, 421
Peptide I, Astwood's, effect of, on glucose uptake of isolated perfused rabbit heart, 504
Phosphorus, excretion of, effect of sudden blood calcium depletion on, 266
Pituitary gonadotrophins, importance of bioassays for, 138
purified, proteinase contamination of, 809
release of, 108
Pituitary hormones, and splanchnomegaly, 714
Pituitary lipid mobilizer, effect of, on glucose uptake of isolated perfused rabbit heart, 504
Pituitary-adrenal system, in MtT rats, 617
Polyols, enzymes from bovine placenta and seminal vesicle that oxidize, 429
Portacaval shunt, glutamine synthetase activity after, 805
Pregnenolone biosynthesis, adrenal, inhibition of, by amphenone, 567
Progesterone metabolism by human fetal gonads, 833
Progesterone-4-^{14}C, conversion of, to 18-hydroxycorticosterone and aldosterone, 865
Prostate, and hypothalamus, 114
Protein synthesis, and cortisone, 709
in rat adrenals, inhibition of, 649
Pyridoxine deficiency, and gluconeogenesis, 742

Reserpine inhibition of vasopressin release, 889

SC-11835, mineralocorticoid-blocking properties of, 724
Serotonin suppression of luteinization, 885
17α-Estradiol, separation and estimation of, 870
Sex steroids, and glycoproteins, 825
Skeletal muscles, dehydrogenase activity in, 233
Spermatogenesis, initiation of, *in vitro*, 788
Splanchnomegaly, and pituitary hormones, 714
Steroid biosynthesis, in fetal ovary, 846
by rat adrenal, during adrenal regeneration and hypertension, 762

Steroid-protein conjugates, antibodies to, 593
Steroids, effect on preputial glands of female rat, 990
various, effects of, on nidation and fetuses, 573
Superovulation, in androgen-treated immature rat, 811

Testosterone, effect of, on glycolic acid oxidase levels, 128
prolonged administration of, effects on adrenal steroids of, 187
Thiouracil, effects on liver protein metabolism, 878
3-Enol etherification, and oral activity, 79
Thyroid follicle, thyroglobulin in, 333
Thyroid glands, amino acid activation in, 273
Thyroid hormones, peripheral metabolism of, 800
sensitivity to, 770
synthesis, and iodide, 731
Thyroid: serum radioiodide concentration ratios, influence of estradiol on, 680
Thyroid tumors, effect of thyroidectomy on, 925
Thyroidal iodine, equilibration of, 212
Thyroidectomy, effects on liver protein metabolism, 878
Thyroiditis, experimental allergic, metabolic studies on, 746
Thyrotropin, and the rat hemidiaphragm, 643
Thyroxine, absorption of, from small intestine, 694
deiodination of, effect of catalase inhibitors on, 627
metabolic response to, 994
synthesis of, stimulatory effect of thyrotropin on, 304
Thyroxine-^{131}I, metabolism of, 611
TPN dehydrogenase, of liver and kidney, 521
Triiodothyronine, and LDH isozyme pattern, 87
Triparanol, effects of, on gestation, 64
and testosterone biosynthesis, 201
TSH, of thyroid cell monolayer, effect of, 170
T3-^{131}I uptake test, use of, for evaluating thyroid function in rats, 415
20α-Hydroxy-Δ^4-pregnen-3-one, failure of, to maintain pregnancy in ovariectomized mice, 149

Uterine metabolism, influence of histamine on, 372

Valine-l-C^{14}, uptake of, in rat liver and uterus, 1
Vasopressin, effect of, on pituitary-adrenal secretion, 538
inhibition of release of, by chlorpromazine and reserpine, 889
Vasopressin analogues, and blood glucose, 803
